- » Clinic Website Design

In order to receive incentive for EMR under the Stimulus Package (ARRA ACT), it is crucial for providers to demonstrate "Meaningful Use" of EMR as soon as possible. OmniMD™ EMR, version 6.0.5 is a CCHIT Certified® 2006 Ambulatory EHR. OmniMD™ SureScripts Certified eRx surpasses the criteria of "Qualified eRx", which would facilitate providers to get incentive from Medicare.

OmniMD™ offers both Enterprise and Software as a Service (SaaS) model for its EMR and Practice Management Solutions. For physicians interested in Software as a Service (SaaS) model, OmniMD™ will provide all the hardware and software to run OmniMD™ applications and manage them 24/7 at its SAS70 Type II Certified Data Center.

## ABOUT OmniMD

OmniMD™ EMR, Ver 6.0.5 is a CCHIT® certified 2006 Ambulatory EHR and is a developer of HIPAA\* compliant clinical solutions, designed to fully automate the work-flow of contemporary healthcare organizations. The company is a division of Integrated Systems Management, Inc. (ISM), a leader in Internet consulting and e-business development since 1989. We have successfully positioned ourselves as a significant force in the healthcare information technology field, rapidly securing a base of clients that has continued to grow exponentially since the division's formation a decade ago.

As pioneers in laying benchmarks in the healthcare industry with our range of products and services, OmniMD™ has strengths in innovation and technical leadership of Electronic Medical Records Software, PMS, Medical Transcription, Medical Billing and Medical Document Management. The company strives to make a positive paradigm shift in the way physicians' function.

## TESTIMONIALS

"The Center for Wound Healing, Inc. is a managed health services organization dedicated to treating the growing number of chronic wound patients via traditional wound care and hyperbaric methodologies. We currently operate wound care centers at 34 hospitals in New York, Pennsylvania Massachusetts, New Jersey and West Virginia. Starting on February of 2008, we partnered with ISM/OmniMD™ to provide a state of the art, HIPAA compliant, web-based electronic medical records application. The experts at OmniMD™ customized their application for use in our wound care centers. Though the transition from a legacy EMR application to a new platform such as OmniMD™ is normally fraught with difficulties, ISM's technical and customer support teams helped make the new deployment as smooth as possible. OmniMD™'s trainers were extremely knowledgeable and the team included at least one physician."

**Alejandro Moya**

**Director-Information Technology, Center for Wound Healing Inc., NY**

"The integrated registration, scheduling, EMR, fax server, document imaging, and billing modules have very much improved the efficiency of Kimball Medical Center's outpatient occ-health and rehab services. Your onsite training and electronic customer support keeps our 40+ users very pleased. Thank you for exceeding our expectations."

**Caryl Russo, Senior Vice President Development**

**Saint Barnabas Health Care System, Kimball Medical Center Foundation Inc., NJ**

"During the last three years period, we have developed a high level of satisfaction and confidence in OmniMD™ product. Our group consists of five locations with 24 doctors from various specialties. The OmniMD™ team is very responsive and supportive of our customization needs and has repeatedly come up with prompt and effective solutions."

**Rajeev Sindhwani,**

**President and Medical Director, DOCS, NY**
