

Medical practices today function in a dynamic, complex and information driven environment. 24X7 quality care and immaculate services have become the norm. Re-defining the medical world are critical processes, which can re-define the output across staff. We at OmniMD endeavor to re-define your practice with state-of-the-art enterprise clinical solutions. Our solutions work for diverse clinical practices as the backbone in providing quality care with seamless workflow.

Info Vault EMR's suite of products and services empower clinics with the ability to efficiently manage clinical processes and patient information over the Internet. With its comprehensive product modules, the IV EMR suite effectively automates all the vital processes within a practice. Acting as a single gateway it integrates the complete staff with all interaction points - the pharmacy, billing services, transcription service and the insurance company.

Info Vault EMR
