

SIMPLIFIED

SUPPORT

Precision Scribe is a transcription package that was developed to meet the needs of the transcription service and small healthcare organization.

When we first began working on P-Scribe, the transcription market had no typing package specifically designed for its needs. Transcription companies were forced to either do without or choose expensive products designed for the hospital market. Some of those packages were even too large for smaller medical facilities and lacked the functions required by transcription services.

## Now There's Precision Scribe

Precision Scribe's newest version uses thin client technology with secure, encrypted Internet connections. This allows the small service or the private MT to create its own Internet based ASP-like system.

### Precision Scribe features include:

Easy to use, intuitive screens. Physicians and staff will be using the system within minutes.

Simple implementation. Remote users may download and install modules easily with little or no technical help. Reduce your IT support overhead.

Simplified Support and Updating. Everything is managed from your central server. All templates, users, security issues, etc. are managed from your office. Changes become effective as soon as you make them.

## Modules Included:

- P-Scribe Typing Package
- P-Scribe Administration Module
- P-Scribe Billing & Report Module
- P-Scribe Document Manager
- P-Scribe Viewer
- P-Scribe Template Creator

## Also:

- Custom Interfaces
- DVI Interface Included
- On-Line Support
- Quick Database Search
- Customized Reports
- Transcription & Management Software for the independent transcription service & healthcare organization
- Remote access to documents by physicians and staff for editing and printing
- Automated Billing & Payroll
- Custom Interfaces
- DVI Ready Interface for Demographic Data
- Centralized Management & Distribution
- End user template design module
- Database for your clients use much like an EMR
- HIPAA ready, secure encrypted connections
- SQL databases for stability

Reduce your overhead and eliminate headaches today!
